Southeastern Trains Blackheath to/from London Bridge/Cannon St are:

- Often late/delayed/slow. The ££££ London Bridge Station upgrade and May 2018 Timetable updates have had no impact on improvement.
- Often too short to meet peak-time capacity demand. Where are the promised 12 car trains??
- In poor condition

If Southeastern are retained as provider, they must be audited and policed to deliver a better service. Their net profits are very healthy, so they must either invest to improve their trains or drastically reduce their fares.
