I wish to make my views known to your committee about the existing law in regard to abortion here in N Ireland.

Human life is valuable from the womb to the grave and sadly the most vulnerable are in the womb who do not have a voice of their own. What a desperate record we have on our hands since 1967 almost 9 million babies have been aborted. It has already been proved that in 2016 alone 98% of abortions in Great Britain were carried out for social reasons.

Please stop those who are undermining the already stated will of our elected representatives here in Northern Ireland in that we do not want the law changed.

The voice of those screaming to have this are adding to an already out of control and wayward society that discards babies like they were an inconvenience.

Please consider this carefully.
