Written submission from David Wright (ANI0039)

I am writing from Northern Ireland protesting at further attempts by Westminster to by-pass the excellent laws which we have in Northern Ireland. This has saved an estimated 100,000 lives here. To put this in context the IRA murder campaign “only” caused 2-3,000 deaths and was rightly condemned by all right thinking people!

The evidence from GB and elsewhere is that 98% of abortions are for social reasons with teenagers especially having multiple abortions. Many in later life have regrets with mental, physical and fertility problems while those who have refused abortion are very thankful, even where the child has disability.
