As a person living in N Ireland I am writing to oppose any change in the abortion laws in N Ireland.

I am shocked to read that in 2016 98% of abortions in Great Britain were carried out for social reasons.

Abortion ignores human rights - especially the right to life of the most vulnerable in our society.

The law in N Ireland should be respected and Westminster should not bypass the will of our elected representatives which was made clear in February 2016.
