I live in Northern Ireland and wish to communicate my views on proposals to liberalise abortion laws here.

I want the current abortion laws here to remain as they are. The reasons are simple, straightforward but profoundly important. Lives are saved that would otherwise be lost.

For example, around 1,000 people are alive in this province today who would have been aborted if the Abortion Act 1967 had applied here.

Also, we know that in GB in 2016 98% of abortions were carried out for social reasons. This is effectively abortion on demand.
