I strongly support the Pro-Life Laws in N. Ireland. I was born and have lived in N. Ireland all my life. I repudiate any suggestion that Abortion Laws should be imposed here against the wishes of many of the people of N. Ireland.

If enacted the proposed Abortion Laws would take the life of unborn children. That is murder. To legalise murder to make life easier for others in society is not acceptable.

The vulnerable of our society have the right to life. The Abortion Act in England is being used to terminate babies with minor disabilities and to suit social preferences.

As an estimated 5,000,000 babies have been murdered under the guise of abortion since the current English Bill was enacted! Asking those who condoned or supported the taking of these lives is not reasonable and the unborn children who were aborted cannot be consulted as they are dead.

The Pro-Life Laws in N. Ireland have saved an estimated 100,000 lives. While these laws are devolved to the N.I. Assembly regardless who assumes power to alter these they need to know that they will answer for the murder of the unborn to Almighty God.
