Written submission from Dr Julian Kennedy (ANI0127)

I live in Northern Ireland and am appalled by the close to 9 million selfish and horrific deaths of unborn children in the UK since 1967 the vast majority killed because of “social reasons”. It is estimated our provincial laws have saved 100,000 children from the same fate. The unborn child is afforded NO RIGHTS and has a right to life with it starting at conception. I do not want to see any changes to the law in Northern Ireland, the safest place for the unborn in the UK.
