Written submission from Mr Don Twinem (ANI0205)

I wish to express my strong support for the existing laws on abortion in N Ireland.

The great majority of abortions in GB are for social reasons rather than some serious medical issue which endangers the mother or unborn child.

Abortion is a gross violation of human rights as it constitutes the killing of a defenceless unborn child and is morally wrong.

In a democratic society, it ought to be the people of N Ireland who decide on this vitally important issue of our abortion laws.
