I live in Northern Ireland and I’m proud to live in a country that protects the most vulnerable in our society the unborn child. I am total advocate of the pro-life laws that exist in this country and I am pleading with you to preserve the existing laws.

How can we possibly mourn with a woman who miscarriages and then rejoice with a woman’s choice to kill her unborn child.

We know that most of abortions are for social reasons i.e. that it is inconvenient for the woman to have a child. In the UK in 2016 98% were for social reasons. Why can’t we make the choice before we have intercourse or use contraception if we do?

We also mourn the loss of 2 lives when a pregnant woman is murdered.

Why do we make a choice to call it life when it suits surely life is life? The most amazing thing humans do is produce life and the most destructive thing we do is kill. My view is in making abortion legal we are saying this baby’s life doesn’t matter and we are legalising the murder of the truly innocent. We as humans should not decide who has the right to live or die.

Also let us not forget the psychological impact on women who have had abortion this is being hidden but real. I know of 2 people who have counselled many young women in this area.

Pro-choice is a choice to kill or to put women through serious psychological trauma.

Please protect the unborn and these women too. I have recently experienced 2 close friends and their struggle to have children and seen the pain when they thought they were pregnant and this ended in the first few weeks are we saying their grief isn’t real would you tell them their babies were never real and alive because I know they knew they were.

I’m hoping you will make a stand for the most innocent in our society.
