Written submission from a member of the public (ANI0358)

The Abortion laws in NI need to be protected. As a Christian it is important not to support the culture of death and pass the teachings of Christ to future generations. Without my children I would be sad, lonely and depressed. My children have brought many joys and happiness to our home/family. It is important that we live; care and love humanity the way Christ would want us to. Also I have a brother that has gone through a tough time after his partner committed suicide a few years back, he has been on a very bumpy and tough journey, after this unfortunate event he has met a new partner and had a child (if this child had of been aborted, as she has a minor disability) my brother would be suffering severe depression and anxiety. Children bring a lot of joy and happiness. Support the culture of life not death! Let’s teach our future generations the right, morale way of life not the wrong one. Choice, choice, choice, that’s all I hear, how about letting the baby have a choice to live not die, they are innocent and have done nothing wrong.
