Written submission from Mr William Gallagher (ANI0383)

The women and equality committee should never be allowed to bring this matter forward, as none of them are representatives of Northern Ireland, what has happened to devolution, also this matter of abortion is in essence the killing of innocent babies, the most basic of all human rights is the right to life under the law, and it is an affront to human dignity not to mention the untold damage (mental and/or physical) that it does to the women.
