Written evidence submitted by Lesley Beggs (ANI0443)

1) DEVOLUTION
The majority of women in Northern Ireland do not want abortion. We care about the unborn children and want no part of their slaughter in the womb. So many women suffer with long term depression, regrets and guilt over abortions they have had affecting their mental health.

2) DISTINCTIVE LAW AND CULTURE
We want to choose to give birth to children with disabilities and to love them unconditionally.

3) HUMAN RIGHTS & EQUALITY
Human rights should extend to the child in the womb. Killing a child in the womb is as heinous as killing it once it is born.
