1) DEVOLUTION
We have a devolved government in NI and Westminster should not be interfering in this matter. I voted for a party that does not believe in abortion and my democratic vote should be heard. Not one of these women are from NI and do not represent women here.

2) DISTINCTIVE LAW AND CULTURE
When a pregnant women attends a GP there are 2 lives to be treated. My special needs [relative] has brought joy to our family and we are proud of him. He deserves a life, there is no greater human right than life itself. I am proud that NI is the safest place for an unborn child with a disability.

3) HUMAN RIGHTS & EQUALITY
In case of rape, the morning after pill is available free on the NHS so there is no justification for abortion. Every child deserves has the right to life no matter how short. I cannot see how aborting a child with a life limiting condition and disposing of them in a furnace with medical waste makes a bad situation any better. Surely supporting a mother and her baby for it's short life has a better long term outcome. Women and children deserve better than a quick, cheap abortion.

4) PERSONAL STORIES
My [5-10] year old [relative] is non verbal, wheelchair user and fed by tube. We are all so proud of him. He has proved neurologist and doctors wrong and brings great joy. It was a frightening experience due to the doctor's always giving worst case diagnoses. The greatest gift [name] has given us, is to live and enjoy today. He brings out the best in people and when we are out and about he brightens people's day with his infectious laugh. His school teachers, classroom assistant, bus driver and care assistants are all great with him.

I am so proud we don't have abortion here. NI folk have a great sense of community and abortion is a backward step. It's a pity the money spent on promoting abortion was not used for benches and hoists to be fitted in disabled toilets.
