1) DEVOLUTION
The NI Assembly is suspended therefore our own politicians are not in a position to make this decision. This is a sensitive subject which needs to be decided by our own politicians. Ours is a devolved assembly and it would be wrong to interfere in this decision.
A recent poll has shown that 64% of our people think that this should be decided by our own elected politicians.

2) DISTINCTIVE LAW AND CULTURE
100.000 people are alive today because of NI unique laws on abortion. This law must be respected. The womb should be the safest place for a child, if our law is changed then most babies with disabilities will be aborted.
Abortion discriminates on the grounds of disability. Medical opinion has been proven to be wrong in the past.

3) HUMAN RIGHTS & EQUALITY
Abortion discriminates on the grounds of disability. Medical opinion has been proven to be wrong in the past.
Both lives should be respected and one does not take precedent over the other. The rights of the mother should not take precedent. Every life is important and should be valued.
The unborn have no voice but ours and we need to stand up for them.
