Written submission from Hildred Cunningham

1) DEVOLUTION
Please let our elected representatives here in NI decide. The peope of NI are very capable of holding their own MLA’S to account thank you. DO NOT try and impose the legalisation of infanticide by mostly irresponsible woman who have vast contraceptive resourced avaiabke to them. Apart from the dreadful circumstance of rape there is no excuse for any woman to become pregnant if she doesn’t wish to. There is certainly no excuse to kill the innocent child due to the promiscuity and incompetence of heartless and selfish women.
Women used to be the greatest protector of their unborn baby. They now seem to be the greatest threat.

2) DISTINCTIVE LAW AND CULTURE
The law as it stands in NI has been the greatest protector of the unborn disabled. Elsewhere many disabled unborn infants have been murdered in the womb, especially those with Downs Syndrome. This is a disgusting slur on any society let alone a supposedly civilised one.
We need to provide the greatest protection for the weakest in society and those who have no voice yet.

3) HUMAN RIGHTS & EQUALITY
Human rights must be granted to all or none. Let’s have some equality for the unborn. Anything else allows one group to selfishly look after its own interests at the expense of the unborn lives.

4) PERSONAL STORIES
