1) DEVOLUTION
As a citizen of Northern Ireland I would like it to be recorded that Westminster should not be debating about abortion on our behalf. We are able to make intelligent decisions on abortion. We have said no to abortion and I cannot understand why some people find it necessary to ignore our views and keep pushing their agenda on our 6 counties. Please listen when we speak.

2) DISTINCTIVE LAW AND CULTURE
We want to keep our nation safe. We want to protect the lives of everyone and that includes lives of those in the womb. Why do you feel you have the right to say who deserves to live and who deserves to die. Why do you place a baby in the womb as no more that a piece of tissue and not a human being. To have a disability is no reason to terminate a life. We do not discriminate on disability and want to include the unborn in that as their voice has been ignored. Someone has to speak up for life.

3) HUMAN RIGHTS & EQUALITY
I find it horrific that the right to equality for women can be measured through allowing women to have the choice to end the life of their own unborn child. We fight day and daily to keep pre-term babies alive but if the baby is in the womb we should have the right to kill them. I say kill because this is a life with a future, not a piece of tissue which we can discard.

4) PERSONAL STORIES
Why do we allow and actually assist mothers in their grieving process ,when any throughout their pregnancy have an unplanned abortion? Why do we facilitate this if the unborn baby has no rights as a piece of tissue would. We do this because the mother has lost her baby. A living being with a future had the unborn survived.
