1) DEVOLUTION
Our representatives are currently not in government. People in NI have a strong and unique set of values which are not always understood by mps based in England. How many westminster mps are going to come and speak to women individually to find out their thoughts and views.

2) DISTINCTIVE LAW AND CULTURE
In NI we have an accepting society that has always been open to people with disabilities. They are entitled to live and indeed they enrich the lives of others in so many ways. Why should that opportunity be taken away by allowing unborn babies with disabilities to be terminated right up until birth.
