1) DEVOLUTION
It is a matter solely for the devolved government. We elect them to represent our views, not far removed MPs in Westminster.

2) DISTINCTIVE LAW AND CULTURE
How can we ever protect an unborn child if we make it legal to obtain abortion on demand. The number of women receiving more than 3 abortions is shocking and therefore the killing of an unborn child should be excusable by 2 people who have been careless.

3) HUMAN RIGHTS & EQUALITY
As a woman myself I take responsibility of my contraception and every woman should do the same, it is not acceptable that a child should lose its right to life because of a careless mother.

4) PERSONAL STORIES
I have worked in a severe learning difficulty school and the thought that some of those children can be disregarded as being value human beings is not something I think belongs in a civilised or humane society.
