1) DEVOLUTION
This is for those elected by Northern Ireland to represent us to sort out. There are no northern Ireland assembly members on the women's equality committee. Therefore our voice is not being heard, we are being treated like the voiceless baby's in the womb, and we are born, how's that democracy. This is British bullying.

2) DISTINCTIVE LAW AND CULTURE
We want to support women, with their pregnancy. Abortion is wrong it is sexist and does not support or help vulnerable women, who are forced by partners to have abortion. It is anti equality as it's says disabled people don't deserve to live.

3) HUMAN RIGHTS & EQUALITY
It took to people to make a baby, that baby is human, the two consenting adult had a choose to use a condom or or other barrier to prevent a pregnancy. The baby is human, and therefore should have a right to life. Where else does it make it right to kill, a human so another human is equal. That's not logical.

4) PERSONAL STORIES
I know, my mother didn't plan me, therefore I am grateful that she wasn't bombarded by the liberal agenda to abort me, would you be here, if the law didn't protect you?. She refers to me as a blessing, and a peace maker. I have worked in social services supporting the vulnerable and marginalised and believe life is precious. In my experience, with support and nurturing, and some help, people can parent and reap great rewards and fulfillment. Abortion only cause dead, pain, long term mental health problems. How can that be what's best for women in crisis.
