1) DEVOLUTION
Protection of the unborn is not an issue for Westminster as it should be for our own Stormont government to decide against.

If Westminster starts to make such decisions for us what would be the point of having devolved government.

2) DISTINCTIVE LAW AND CULTURE
We value equality but where is the equality when a child is killed in the womb because it is weak or has a disability.

3) HUMAN RIGHTS & EQUALITY
Northern Ireland's laws protect mothers from making life-destroying decisions at a very traumatic time in their lives.

4) PERSONAL STORIES
My daughter has [a condition] and is a popular member of staff where she has a very demanding permanent job. She owns her own house and car.

Thank God for the great blessing she is to us and her extended family and community.

Protect the unborn.
