1) DEVOLUTION
Having lived in Northern Ireland for 30 year and England for 30 years, where i was born. I find people of NI have different values and they value the life of an unborn child very highly. I can not understand how people in Westminster can make a valid decision for NI.

2) DISTINCTIVE LAW AND CULTURE
I work with special needs children and adults. This group of people do have a place in society and at times they can teach us a lesson or two. Their lives do matter as every unborn child life matters.

3) HUMAN RIGHTS & EQUALITY
The unborn child has the right to be born so where does his/her rights come in to this discussion.

4) PERSONAL STORIES
My mother had an abortion while we lived in England. On [date] she lost her life after complications having the abortion. Because of this [law] in England my sister and i lost our mother and a sibling. Our father lost his wife and a child. He carried so much guilt and grief after this and my sister and i watched him slipping into depression as we were struggling with grief and trying to come to terms with what had happened. For some women it is a way to get rid of an inconvenience. I do not know why my mother chose to have an abortion but i do know it turned our lives upside down and still hurts today as my children never knew their grandmother or potential aunt or uncle.
