1) DEVOLUTION
This matter should be decided by the politicians in Northern Ireland. Westminster should not interfere.

2) DISTINCTIVE LAW AND CULTURE
Northern Ireland can be proud that abortions in Northern Ireland, even counting those done abroad, are seven times lower than the rest of the UK and disabled people can think of themselves as being treated with respect.

3) HUMAN RIGHTS & EQUALITY
Science confirms that a human life begins from the moment of conception and is the start of a long process ending in the grave. Both lives matter. How is it equal for a woman to kill her baby?

4) PERSONAL STORIES
Not all women who go for abortions really want one. Making it easier to have one will make them more vulnerable to pressure from others. If indigenous people had more babies the less immigration would be required.
