1) DEVOLUTION

I am appalled to think that a Committee in Westminster should ever think that they had the right to make such an important decision on behalf of the residents of Northern Ireland. It is also my belief that none of the females on this Committee represents a seat in N. Ireland so why should they make recommendations on our behalf.

A few years ago I watched a BBC documentary entitled "The Boy with no Brain". It was about a baby who was found while in the womb that his brain was not developing due to fluid. Abortion was offered five times and refused. The parents had decided that while the baby had a heartbeat it was still their baby. The last update I had Noah (his name) had his problems but was progressing wonderfully well and he had taught eminent trauma Doctors so much about the brain which had grown from 2% to 80%, unheard of previously.

2) DISTINCTIVE LAW AND CULTURE

If a person, male or female, young or old, is severely injured in an accident we don't decide to terminate their life so why should we terminate a baby's life before it has had the chance to live.

So many healthy babies have been aborted when actually the womb should be the safest place for a baby to be. I am proud that I live in N. Ireland where we have laws to protect the unborn child. The thought that a baby could be aborted up to full term chills me to the bone.

3) HUMAN RIGHTS & EQUALITY

4) PERSONAL STORIES
