1) DEVOLUTION
Regardless of authority it is wrong to take life. There are enough means available in cases of rape such as the morning after pill to avoid unwanted pregnancies that no change in the law is needed.

2) DISTINCTIVE LAW AND CULTURE
If culture supports the taking the life of the unborn logic states murderers should be applauded. Are pro-abortionists saying their Mum’s should have aborted them?
It is not right for pro-abortionists to say society has the right to murder unborn children. Whether it is one life or 100,000 lives saved we need to protect the vulnerable in society.

3) HUMAN RIGHTS & EQUALITY
Strange that many pro-abortionists want to kill unborn children, vilify those with pro-life views under the claim of human rights or equality.
Their perverted view of equality is whatever I want is right and everyone else is wrong. That is not equality or a human right.

4) PERSONAL STORIES
