Prescription Cost Analysis for England 2007

Sources and Glossary of Terms and Codes Used

Background to PCA

1. Prescription Cost Analysis (PCA) data is based on information obtained from prescriptions sent to the Prescription Pricing Division of the Business Services Authority (PPDBSA) for payment. Currently PCA data covers all prescriptions dispensed in the community, i.e. by community pharmacists, appliance contractors, dispensing doctors, and items personally administered by doctors.

Prescriptions included

2. Prescriptions written by General Medical Practitioners in England represent the vast majority of prescriptions included. Prescriptions written by dentists and hospital doctors are also included provided that they were dispensed in the community. Also included are prescriptions written in Wales, Scotland, Northern Ireland and the Isle of Man but dispensed in England. Prescriptions written in England but dispensed outside England are not included. The data does not cover items dispensed in hospital or on private prescriptions.

Definitions

3. Therapeutic classification

PCA data is based currently on the therapeutic grouping used in the British National Formulary. The classification in this report is based on the September 2006 BNF (edition 52). While the therapeutic classification of drugs occasionally changes, all PCA publications reflect the classification in use at the time of publication.

The PPDBSA has created pseudo BNF chapters, which are not published, for items not included in BNF chapters 1 to 15. The majority of such items are dressings and appliances, which the PPDBSA has classified into four pseudo BNF chapters (20 to 23). The PPDBSA has produced a booklet on BNF classifications and the pseudo classifications used. This is available on the internet at:

http://www.ppa.org.uk/pdfs/BNF_Booklet_2006.doc.pdf

4. Drug name

The drug is shown by individual preparation name, which may be proprietary or generic, followed by form and strength. The names used are often presented in an abbreviated form.

5. Items dispensed (PXS)

A prescription item refers to a single item prescribed by a doctor (or dentist/nurse) on a **prescription form**. If a prescription form includes three medicines it is counted as three prescription items.

6. Net Ingredient Cost (NIC)

NIC refers to the cost of the drug before discounts and does not include any dispensing costs or fees. It does not include any adjustment for income obtained where a prescription charge is paid at the time the prescription is dispensed or where the patient has purchased a pre-payment certificate.

7. **Quantity (QTY)**

The quantity of a drug dispensed is measured in units depending on the formulation of the product. See standard quantity unit below. Quantities are not added together across preparations because of different strengths and formulations.

8. **Standard quantity unit (SQU)**

This code indicates the form of the drug and the units in which quantity is measured:

Code 1 - a unit (e.g. one tablet, capsule, pack, aerosol etc)
Code 3 - millilitres
Code 6 - grammes
Code 0 - individually formulated (unit varies)

9. **NIC per PXS, NIC per QTY and QTY per PXS**

These are calculated averages using PXS, NIC and QTY

10. **Class of preparation (Prep Class)**

Generic prescribing is encouraged and many drugs are now prescribed generically even when they are not available in generic form (principally because the branded product is still in patent). Within the PCA system prescriptions for drugs are classified in four ways:

Class 1 - Drugs prescribed **and** available generically

Class 2 - Drugs prescribed generically but only available as a proprietary product

Class 3 - Drugs prescribed and dispensed by proprietary brand name

Class 4 - Dressings and appliances

11. **Treatment of prescription items written generically**

The information in this volume and particularly the allocation of classes 1-3 to drugs by the PPDBSA reflect the rules for reimbursement.

Where a pharmacist has dispensed the generic form of the drug and has been reimbursed at the generic price, the data for the drug dispensed will be recorded against the class 1 (generic) form of the drug in PCA. Where a generic is not available and hence a pharmacist has been reimbursed at proprietary prices for dispensing the proprietary form, the data will be defined as class 2 and recorded in PCA against the class 3 (proprietary) form of the drug.

Where a drug is defined as class 2, the prescription items, NIC, etc for it are allocated across the items for all equivalent proprietaries. This is done pro rata on the basis of the number of proprietary prescription items dispensed. The column headed "Of which Class 2" (Owc2) in the tables gives the number of prescription items resulting from this apportionment. There are a small number of preparations that are not linked to equivalent proprietaries that appear separately with a class of 2.

Part VIII of the Drug Tariff, published by The Stationery Office and available from the Stationery Office Bookshops, lists the basis for reimbursement for most commonly prescribed generic drugs which are (in most cases) available generically.

In some cases, although a generic is available and the pharmacist has been reimbursed at the Drug Tariff price, the pharmacist may have chosen to dispense the

equivalent proprietary product. This will, none the less, be recorded against the class 1 form of the drug.

How to find the drug you are looking for in this book

12. The drugs listed in this book are grouped by chemical entity within the BNF category or categories they belong to. If you don't know which BNF category a drug falls into this can be found from index at the back of the book which lists alphabetically all proprietary and generic names for drugs in BNF chapters 1 to 15.

Example

13. You may require data on all Simvastatin preparations:

Pdf version

- Look up Simvastatin in the index – it falls into BNF Section 2.12 (Lipid-Regulating Drugs).
- Find the pages with BNF: 2.12 Lipid-Regulating Drugs in the bottom right-hand corner. Within these pages chemical entities are listed alphabetically.

Spreadsheet version

- Go to the 'Individual Preparations' worksheet at the beginning of the workbook.
- Sort the worksheet by Column B (BNF Chemical Name) and find Simvastatin in that column.

Drug name	BNF Chemical name	Prep class	SQU	Pxs	Owc2	Nic	Qty	Nic/Pxs (£)	Nic/Qty (£)	Qty/Pxs
Simvador_Tab 10mg	Simvastatin	3	1	72.2	0	128.5	2746.2	1.78	0.05	38.03
Simvador_Tab 20mg	Simvastatin	3	1	209.9	0	461.3	8176.8	2.20	0.06	38.95

Simvastatin_Liq Spec 40mg/5ml	Simvastatin	1	3	0.5	0	121.9	79.9	236.64	1.53	155.05
Simvastatin_Oral Susp 20mg/5ml S/F	Simvastatin	1	3	2.9	0	343.2	637.3	119.10	0.54	221.12
Simvastatin_Oral Susp 40mg/5ml S/F	Simvastatin	1	3	0.4	0	51.1	59.1	132.71	0.86	153.51
Simvastatin_Tab 10mg	Simvastatin	1	1	3074.3	0	5576.8	115734.9	1.81	0.05	37.65
Simvastatin_Tab 20mg	Simvastatin	1	1	9970.9	0	21890.3	375711.0	2.20	0.06	37.68
Simvastatin_Tab 40mg	Simvastatin	1	1	15158.3	0	58068.9	560281.2	3.83	0.10	36.96
Simvastatin_Tab 80mg	Simvastatin	1	1	298.2	0	3935.2	11007.5	13.20	0.36	36.91
Zocor_Tab 10mg	Simvastatin	3	1	8.5	0	232.0	360.2	27.24	0.64	42.30
Zocor_Tab 20mg	Simvastatin	3	1	12.1	0	531.3	501.0	43.85	1.06	41.35
Zocor_Tab 40mg	Simvastatin	3	1	10.5	0	447.4	421.9	42.52	1.06	40.10
Zocor_Tab 80mg	Simvastatin	3	1	1.2	0	47.2	44.5	39.68	1.06	37.42

Both versions

- There were 15 preparations for Simvastatin in this BNF category where 50 or more items were dispensed in 2007 (see paragraph 3 above).
- Eight of these preparations were generic (Prep Class 1) and seven were proprietary (Prep Class 3).
- Simvastatin came out of patent in May 2003, so from this date the generic form became available.
- 12,100 items (Pxs) of Zocor Tab 20mg (Prep Class 3) were dispensed in 2007, of which 0 items were prescribed generically (Owc2). This provided 501,000 tablets of the drug (Qty) at an average cost of £1.06 per tablet (Nic per Qty). The average cost per item was £43.85(Nic per Pxs) and the average number of tablets per item was 41.35 (Qty per Pxs).
- 9,970,900 items of Simvastatin_Tab 20mg (the Prep Class 1 equivalent) were dispensed in 2007, providing 375,711,000 tablets at an average cost of 6 pence per tablet. The average cost per item was £2.20 and the average number of tablets per item was 37.68.

Notes

14. The number of prescription items dispensed for individual preparations, dressings or appliances is rounded to the nearest 100. There are a very large number of preparations/dressings/appliances where less than 50 items were dispensed in 2007. While accounting for just under 50% of the total number of preparations dispensed, such preparations covered 0.01% of the total items dispensed. In order, therefore, to keep the publication to a manageable size, such preparations have been excluded, although their figures are included in all total figures such as chemical entity and BNF groupings. Information on these items can be obtained by contacting the address in paragraph 16.
15. EEC Directive 92/27/EEC requires that names of medicinal substances be changed from the British Approved Name (BAN) to the Recommended International Non-proprietary Name (rINN), where the BAN and rINN differ. A full list of the name changes appears in the introductory pages of the British National Formulary. The Prescription Cost Analysis system will reflect these changes from 2003 onwards.

Editorial Information

16. Further details about PCA data can be obtained from:

The Information Centre for health and social care,
1, Trevelyan Square,
Boar Lane,
Leeds LS1 6AE
Telephone: 0845 300 6016
Email: enquiries@ic.nhs.uk

Please let us know at this address if you have any comments on this publication.

17. Annual statistical bulletins which summarise data relating to prescriptions dispensed in the year and highlight some of the trends over the past 10 years are available from the address in paragraph 17. The 2007 bulletin is due to be published on the Internet in July 2008 from www.ic.nhs.uk.
18. Publications (including bulletins) from 1998 to 2004 are available on the Internet at:
www.publications.doh.gov.uk/prescriptionstatistics/index.htm
Publications (including bulletins) from 2005 onwards are available on the Internet at:
www.ic.nhs.uk.

Summary of the number of prescription items dispensed by therapeutic classification based on British National Formulary chapters

England 2007

British National Formulary chapter	Prescription item dispensed (thousands)	Net ingredient cost (£thousands)
1 : Gastro-intestinal system	59,805.6	477,476.8
2 : Cardiovascular system	250,861.9	1,813,361.4
3 : Respiratory system	53,613.0	886,898.6
4 : Central nervous system	137,985.8	1,731,129.0
5 : Infections	45,055.9	220,133.2
6 : Endocrine system	67,437.8	912,151.3
7 : Obstetrics, gynaecology, & urinary-tract disorders	18,324.8	265,604.8
8 : Malignant disease & immunosuppression	3,529.4	328,175.5
9 : Nutrition & blood	29,454.2	397,539.4
10 : Musculoskeletal & joint diseases	28,602.0	205,541.9
11 : Eye	17,153.0	139,932.3
12 : Ear, nose & oropharynx	9,962.1	65,605.0
13 : Skin	35,262.5	238,689.8
14 : Immunological products & vaccines	13,876.7	130,366.5
15 : Anaesthesia	958.7	4,420.2
19 : Other drugs and preparations	1,356.3	51,397.0
20 : Dressings	9,591.5	169,051.3
21 : Appliances	9,367.2	130,109.6
22 : Incontinence appliances	1,493.5	40,279.9
23 : Stoma appliances	2,606.2	164,801.4
Overall total	796,298.0	8,372,667.3
