Banking at the Post Office

The Post Office is one of the fastest-growing providers of financial services in the UK.

Through its network of over 11,500 branches, the Post Office:

- has over 2 million customers for its financial services, such as insurance, savings, and loans including mortgages
- is the UK's leading foreign currency provider
- provides access to 25 million current accounts offered by High Street Banks
- provides a range of financial services for small businesses

The Government would like to see a further expansion of the financial services available at the Post Office.

New ideas could include: a weekly budgeting account, a current account, a children's saving account, business accounts, more mortgages and closer links to credit unions.

We would like to know what you value about Post Office banking services, and which new banking services you would like to see available through the Post Office.

For more information, see contact details overleaf.
